## Data source

National Statistics Organisation

## Data processing

Annual values in domestic currencies provided by NSOs are published without further processing

Amounts in USD are added to the dataset, when necessary conversion is done using period-average exchange rate from PDH.Stat

GDP per capita is calculated by dividing by population projections from PDH.stat for corresponding year/PICT

Variation rates are calculated by comparing current values with value from previous year

Details on particular values used to compute derived indicators are provided in observation footnotes

## Data scheduling

**Frequency** Annual

**Timeliness** Data is published on PDH.Stat when received from NSOs

## Data revision

Data is subject to revision

## Additional comments on the dataset

Currently GDP figures are published only in current prices.
