INTRODUCTION

The morbidity data in this report represent monthly information reported by the individual Pacific Island Health Departments to the South Pacific Epidemiological Health Information Service (SPEHIS) using a standard form designed for reporting certain notifiable diseases.

The accuracy of the reporting (that is, the number of cases that are reported to SPEHIS compared to the actual number) varies considerably depending on the disease and the resources of the Pacific Island country or territory concerned. All users of the information reported should take into account the fact that these are, in general, developing countries which are evolving their own epidemiological surveillance programmes, and should interpret the data in this light. Morbidity rates (per population) have not been calculated, in order to discourage unjustified comparisons.

Any additional specific information relating to the reported material can be obtained directly from the health department of the country or territory concerned or from the Secretariat of the Pacific Community. The population estimates listed for each country and territory were obtained from the SPC Demography/Population Programme's unpublished mid-year 1996 population estimates.

The material contained in the tables consists of the monthly figures for each country or territory and disease as reported to SPEHIS during the year 1996. The reports are complete, except as noted. When no case was reported, '0' was entered in the tables. A blank entry indicates that no data were entered in the SPEHIS monthly reports.

In 1992, due to the evolving epidemiological context and in accordance with the World Health Organization requirements for the surveillance of the diseases targeted by the Expanded Programme on Immunisation, it was decided that four new conditions would be entered into the SPEHIS reporting system. These were: AIDS, cholera, diphtheria and poliomyelitis. Implementation of the system as amended started in January 1993.

INTRODUCTION

Les chiffres de morbidité présentés dans le présent rapport sont tirés des renseignements mensuels fournis au Service d'information épidémiologique et sanitaire du Pacifique Sud (SIESPS) par les services de santé de la région, qui utilisent à cet effet une liste-type de maladies à déclaration obligatoire.

L'exactitude des chiffres fournis (le nombre de cas signalés au SIESPS par rapport au nombre réel) varie considérablement en fonction de la maladie considérée et des ressources de l'État ou territoire océanien intéressé. On tiendra compte, à cet égard, du fait qu'il s'agit en général de pays en développement qui sont en train de mettre sur pied leurs propres programmes de surveillance épidémiologique, et l'on interprétera les données en conséquence. On n'a pas calculé les taux de morbidité des populations pour ne pas inciter à faire des comparaisons injustifiées.

Pour toutes précisions complémentaires sur les renseignements qui nous sont envoyés, s'adresser directement au service de santé de l'État ou territoire intéressé ou au Secrétariat général de la Communauté du Pacifique. Les chiffres de population indiqués pour chaque pays sont tirés d'estimations – non publiées – relatives au milieu de l'année 1996 et établies par le Programme Démographie/Population de la CPS.

Les tableaux donnent les chiffres mensuels par pays et maladie, tels qu'ils ont été fournis au SIESPS en 1996, et sont complets, sauf indication contraire. En l'absence de cas signalés, la mention '0' a été inscrite dans les tableaux. Un blanc signifie que les données n'ont pas été communiquées.

En 1992, compte tenu de l'évolution de la situation du contexte épidémiologique et conformément aux conditions requises par l'Organisation mondiale de la santé pour la surveillance des maladies ciblées par le Programme élargi de vaccination, il a été décidé d'incorporer quatre pathologies au système de déclaration des maladies transmissibles du SIESPS. Ces quatre pathologies sont le choléra, la diphtérie, la poliomyélite et le SIDA. Ce système amendé est entré en vigueur en janvier 1993.

LIST OF COUNTRIES AND TERRITORIES/LISTE DES ÉTATS ET TERRITOIRES

American Samoa	Samoa américaines
Cook Islands	Îles Cook
Federated States of Micronesia	États fédérés de Micronésie
Fiji	Fidji
French Polynesia	Polynésie française
Guam	Guam
Kiribati	Kiribati
Marshall Islands	Îles Marshall
Nauru	Nauru
New Caledonia	Nouvelle-Calédonie
Niue	Niue
Northern Mariana Islands	Îles Mariannes du Nord
Palau	Palau
Papua New Guinea	Papouasie-Nouvelle-Guinée
Pitcairn Island	Île Pitcairn
Solomon Islands	Îles Salomon
Tokelau	Tokelau
Tonga	Tonga
Tuvalu	Tuvalu
Vanuatu	Vanuatu
Wallis and Futuna	Wallis et Futuna
Western Samoa	Samoa-Occidental

LIST OF DISEASES/LISTE DES MALADIES

Acquired Immuno-Deficiency Syndrome (AIDS)	Syndrome d'immuno-déficience acquise (SIDA)
Acute respiratory infection, 0–11 months	Infection respiratoire aiguë, 0–11 mois
Acute respiratory infection, 1–4 years	Infection respiratoire aiguë, 1–4 ans
Acute respiratory infection, 5 years and +	Infection respiratoire aiguë, 5 ans et +
Cholera	Choléra
Conjunctivitis (acute)	Conjonctivite
Dengue fever	Dengue
Diarrhoea, 0–11 months	Diarrhée, 0–11 mois
Diarrhoea, 1–4 years	Diarrhée, 1–4 ans
Diarrhoea, 5 years and +	Diarrhée, 5 ans et +
Diphtheria	Diphthérie
Fish poisoning	Ichtyosarcotoxisme
Gonorrhoea/NSU	Blennorragie
Hepatitis, all forms	Hépatite, toutes formes
Leprosy	Lèpre
Malaria	Paludisme
Measles	Rougeole
Meningitis, all forms	Méningite, toutes formes
Pertussis (whooping cough)	Coqueluche
Poliomyelitis	Poliomyélite
Tetanus, neonatal	Tétanos, néonatal
Tetanus, other	Tétanos, autre forme
Tuberculosis, all forms	Tuberculose, toutes formes
Undernutrition, 0–11 months	Malnutrition, 0–11 mois
Undernutrition, 1–4 years	Malnutrition, 1–4 ans
Undernutrition, 5 years and +	Malnutrition, 5 ans et +
Yaws	Pian
