

# HEALTHY FISHERIES, HEALTHY PEOPLE

**Reproduction (babies)**

HEALTHY FISHERIES RESOURCES

Natural death  
Sustainable fishing

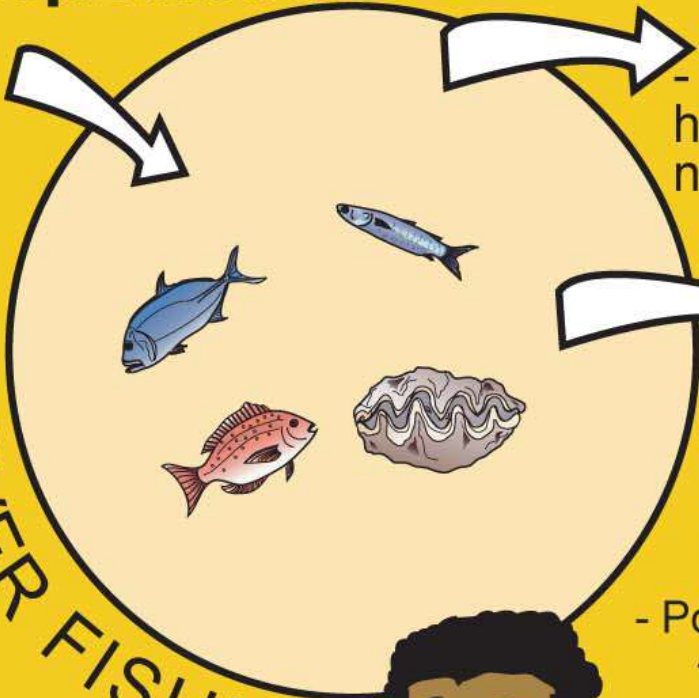

- Healthy community
- Prosperous and happy people

- Wise fisheries management means more food for now and for the future

**Less reproduction**

OVER FISHING

- Over harvesting with nets, lines and spears
- Destruction fishing with poison or xplosives

- Over-fishing

- Malnutrition (not enough body-building foods)

- Poverty (must buy food from shops)

- Cultural decline (with few fisheries resources, youth have a hard time finding something useful to do)
