# *Thunnus orientalis*

PBF

English: Pacific bluefin tuna  
French: Thon rouge du Pacifique  
Japanese: Kuro maguro  
Hawaiian: Bluefin tuna  
Local:

Pectoral fins short — never reach space between dorsal fins  
Nageoires pectorales courtes — ne dépassent jamais l'espace compris entre les nageoires dorsales

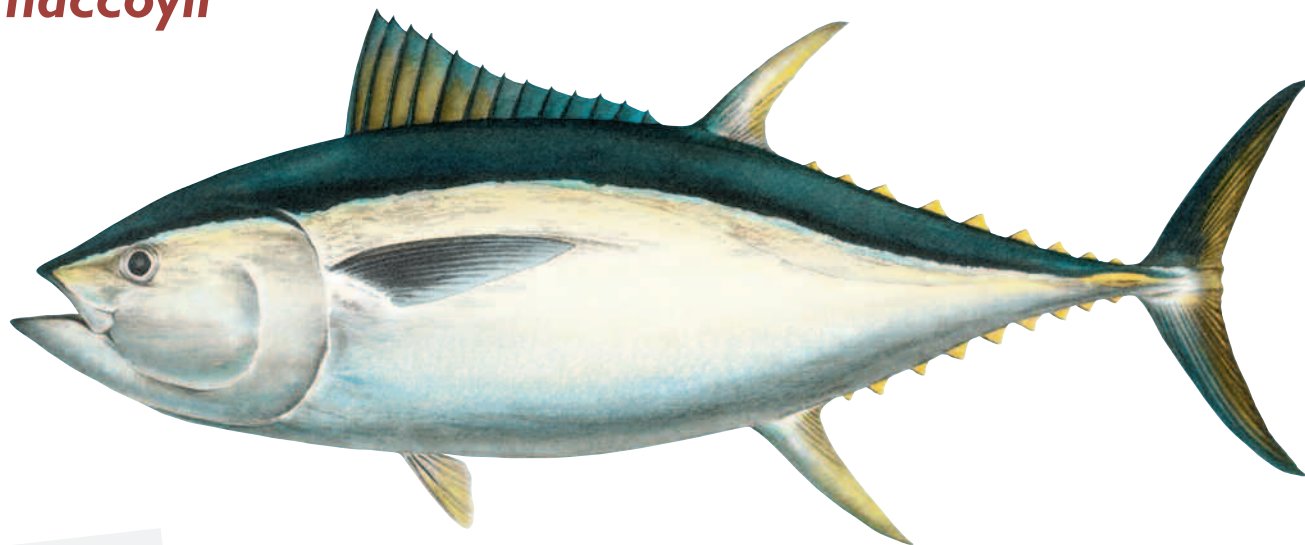

Main caudal keel dark to black  
Carène caudale principale, foncée à noire

Finlets dull yellow or colourless with black edge  
Pinnules jaune pâle ou incolores à bordure noire

# *Thunnus maccoyii*

SBF

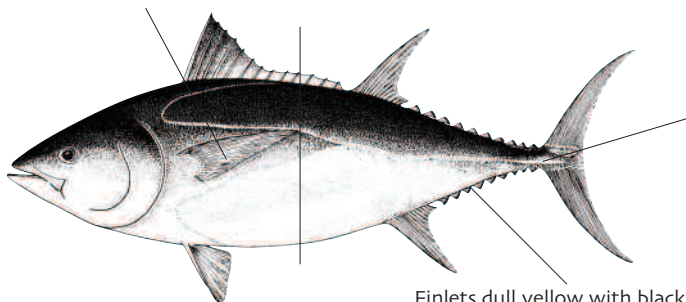

English: Southern bluefin tuna

French: Thon rouge du sud

Japanese: Bachi maguro, Minami maguro

Local:

Pectoral fins short — never reach space between dorsal fins  
Nageoires pectorales courtes — ne dépassent jamais l'espace compris entre les nageoires dorsales

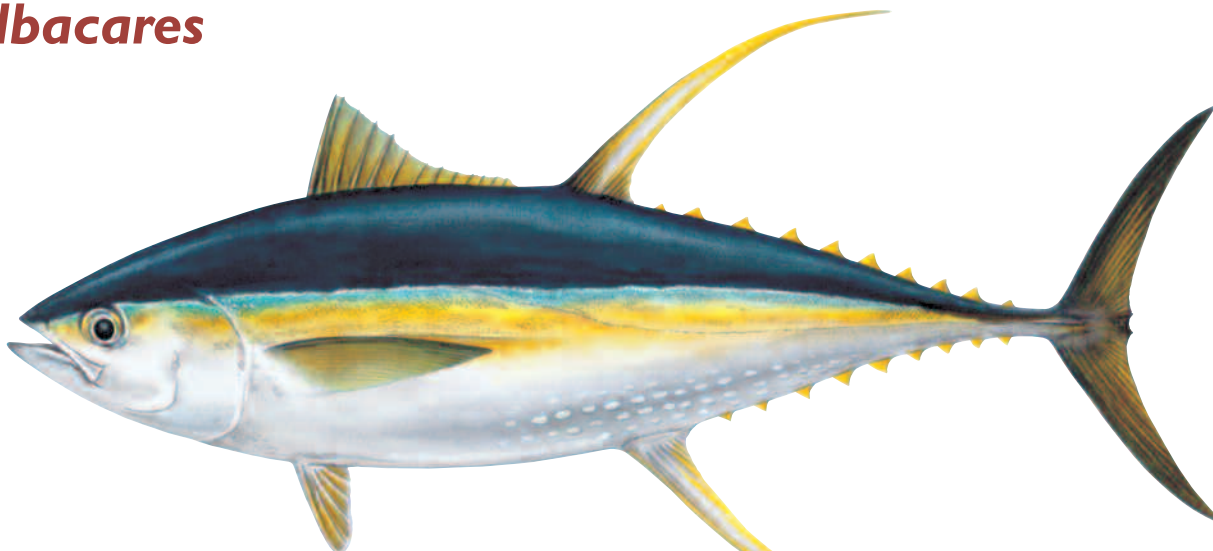

Main caudal keel dull yellow  
Carène caudale principale jaune pâle

Finlets dull yellow with black edge  
Pinnules jaune pâle à bordure noire

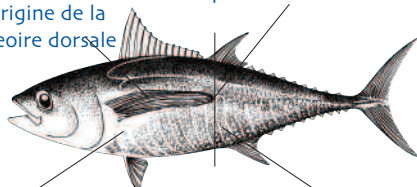

# Thunnus albacares

YFT

Pectoral fins reach start of second dorsal fin  
Les nageoires pectorales atteignent l'origine de la deuxième nageoire dorsale

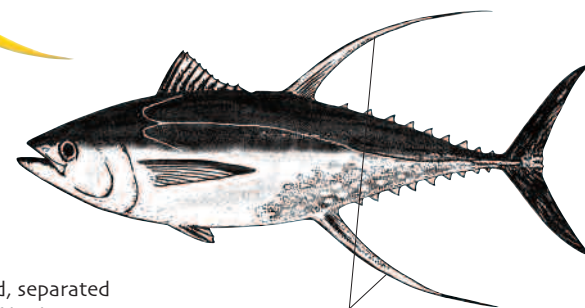

Pectoral fin tip rounded  
Extrémité des nageoires pectorales arrondie

Narrow body, especially near caudal fin  
Corps étroit, surtout près de la nageoire caudale

Lines slightly curved, evenly spaced, separated by lines of spots over most of body  
Lignes légèrement incurvées, régulièrement espacées, séparées par des taches alignées sur la quasi-totalité du corps

Juvenile (to 70 cm)  
Juvénile (jusqu'à 70 cm)

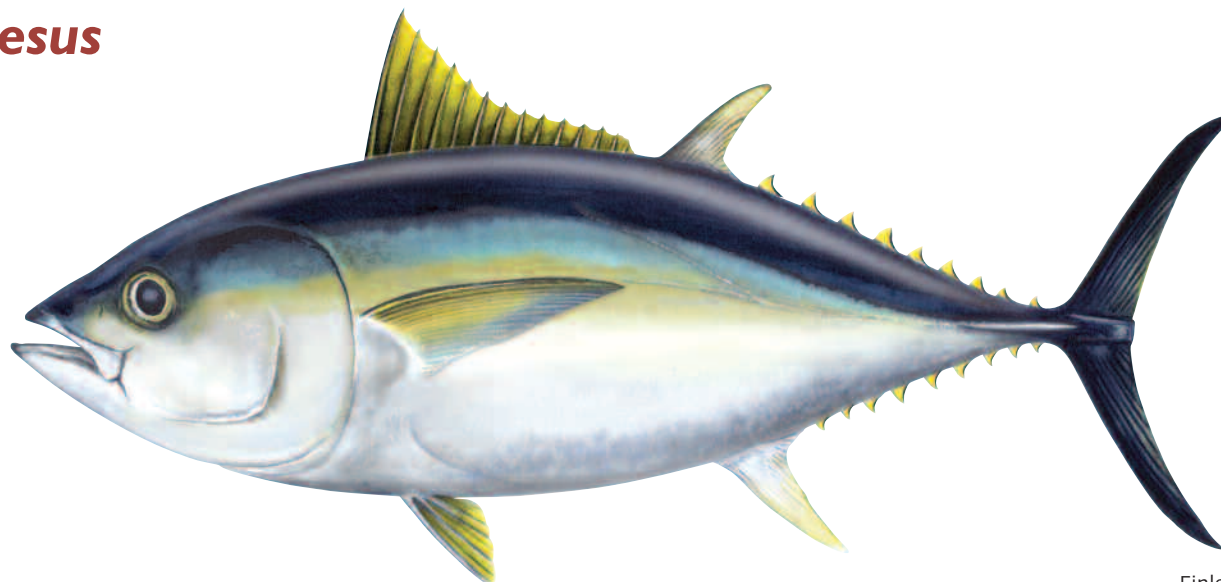

Second dorsal and anal fins very long and yellow  
Deuxième nageoire dorsale et nageoire anale très longues, jaunes

Adult  
Adulte

English: Yellowfin tuna  
French: Albacore, Thon jaune  
Japanese: Kihada maguro, Shibi  
Hawaiian: Ahi (large), Shibi (medium), Shibi-ko (small)  
Local:

# Thunnus obesus

BET

English: Bigeye tuna  
French: Thon obèse  
Japanese: Mebachi, Mebuto, Shibi  
Hawaiian: Ahi, Mebachi, Ahi pō'ouui  
Local:

Pectoral fins reach beyond start of second dorsal fin  
Les nageoires pectorales dépassent l'origine de la deuxième nageoire dorsale

Pectoral fin tip pointed  
Extrémité des nageoires pectorales pointue

Finlets bright yellow with black edge  
Pinnules jaune vif à bordure noire

Stout body  
Corps ventru

Lines almost straight, unevenly spaced with a few erratic spots mostly over lower body  
Lignes presque droites, espacées de manière irrégulière, avec quelques taches irrégulières, surtout sur la partie inférieure du corps

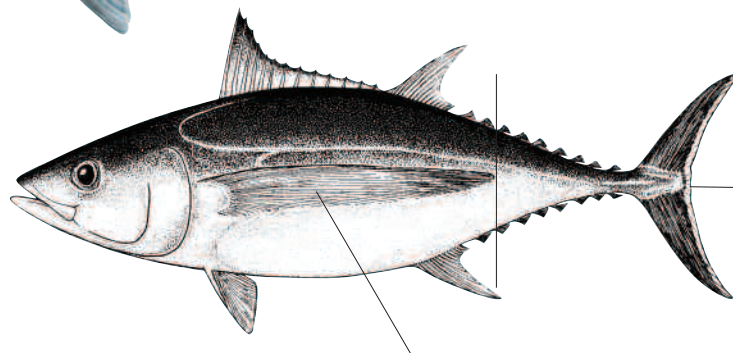

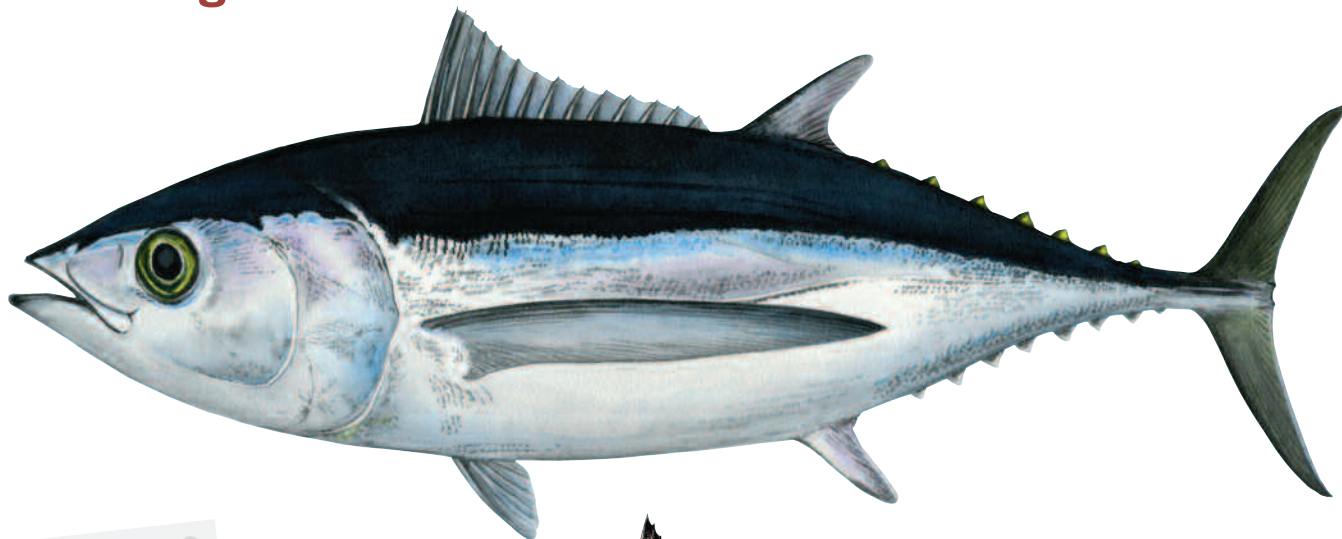

Juvenile (to 70 cm)  
Juvénile (jusqu'à 70 cm)

Pectoral fins can reach space between dorsal fins  
Les nageoires pectorales peuvent atteindre l'espace compris entre les nageoires dorsales

Adult  
Adulte

# *Thunnus alalunga*

ALB

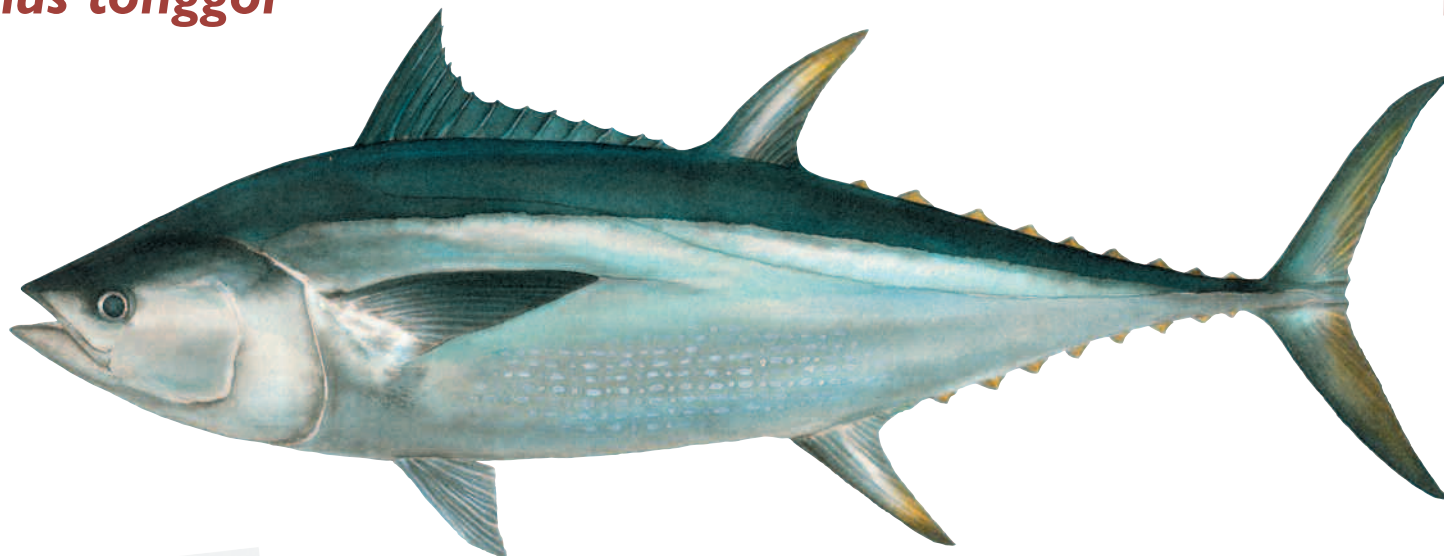

- English: Albacore tuna
- French: Germon, Thon blanc
- Japanese: Tombo, Bincho, Binnaga maguro
- Hawaiian: Tombo, Ahi palaha
- Local:

Back edge of caudal fin  
white or colourless  
Bord arrière de la nageoire  
caudale blanc ou incolore

Pectoral fins reach way past second dorsal and anal fins  
Les nageoires pectorales dépassent largement la deuxième dorsale et la nageoire anale

# Thunnus tonggol

LOT

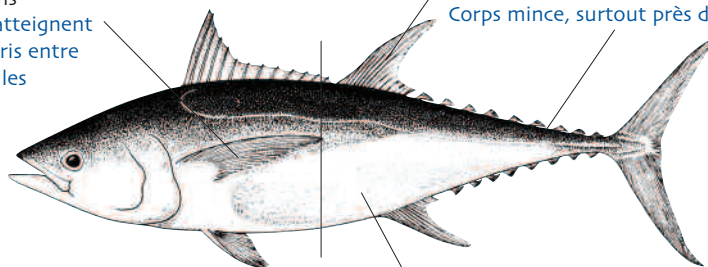

English: Longtail tuna  
French: Thon mignon  
Japanese: Koshinaga  
Local:

Pectoral fins barely reach space  
between dorsal fins  
Les nageoires pectorales atteignent  
tout juste l'espace compris entre  
les nageoires dorsales

Second dorsal fin taller than first dorsal fin  
Deuxième nageoire dorsale plus haute que la première nageoire dorsale

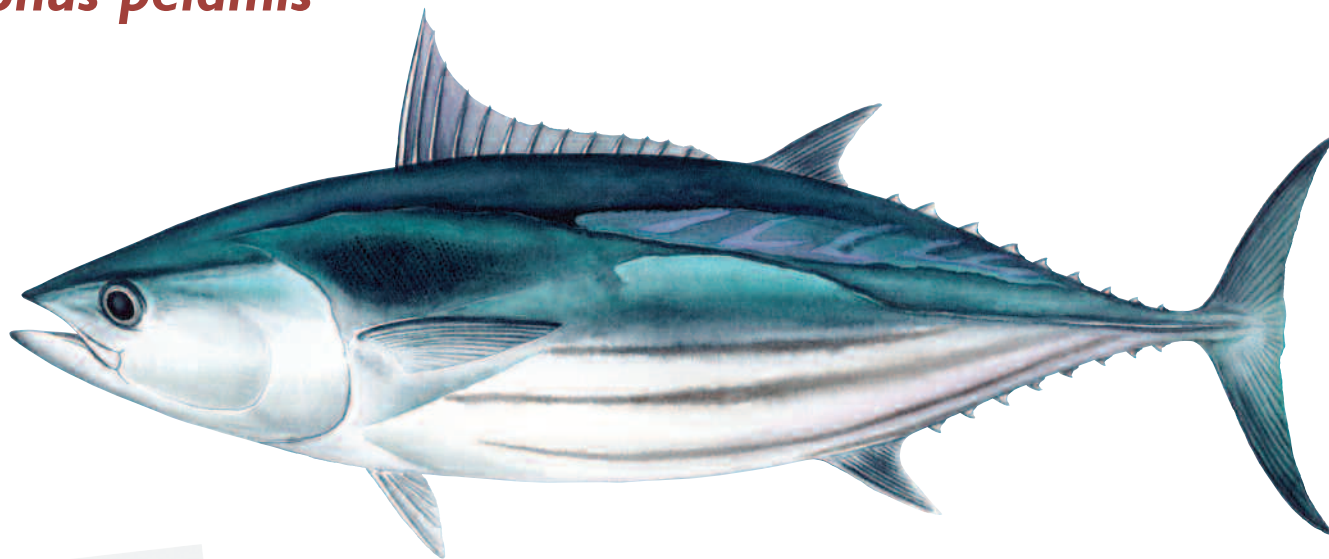

Body slender, especially towards caudal fin  
Corps mince, surtout près de la nageoire caudale

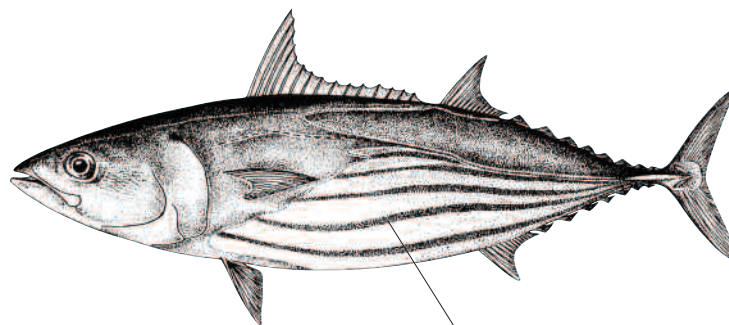

Faint rows of colourless spots along belly  
Rangées à peine visibles de taches incolores le long du ventre

## *Katsuwonus pelamis*

SKJ

English: Skipjack tuna  
French: Bonite à ventre rayé  
Japanese: Katsuo  
Hawaiian: Aku,  
Otaru (when large)  
Local:

Three to five stripes along belly  
Trois à cinq rayures sur le ventre

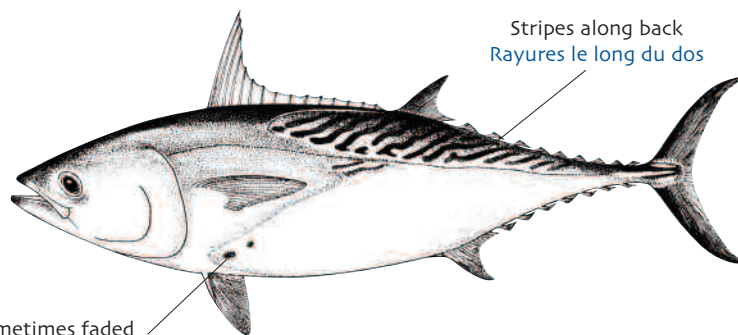

# *Euthynnus affinis*

KAW

English: Kawakawa,  
Mackerel tuna  
French: Thonine orientale  
Japanese: Suma  
Hawaiian: Kawakawa  
Local:

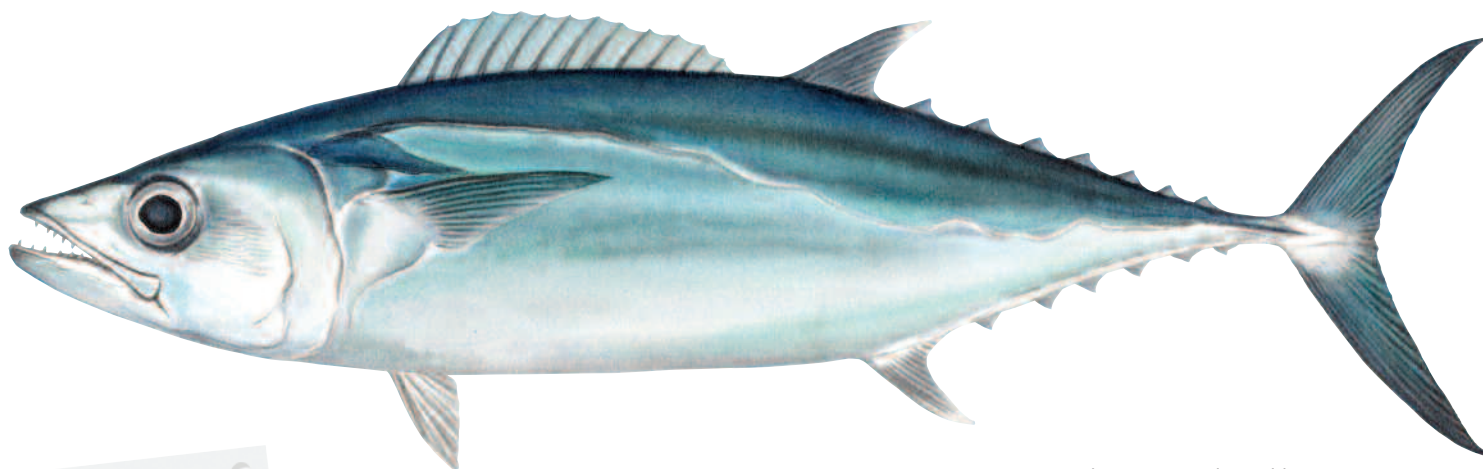

Stripes along back  
Rayures le long du dos

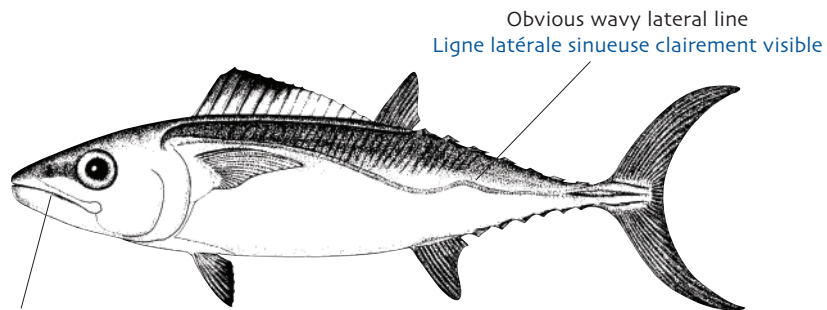

Black spots, sometimes faded  
Taches noires, parfois décolorées

# *Gymnosarda unicolor*

DOT

English: Dogtooth tuna  
French: Bonite à gros yeux,  
Thon dents de  
chien  
Japanese: Isomaguro  
Local:

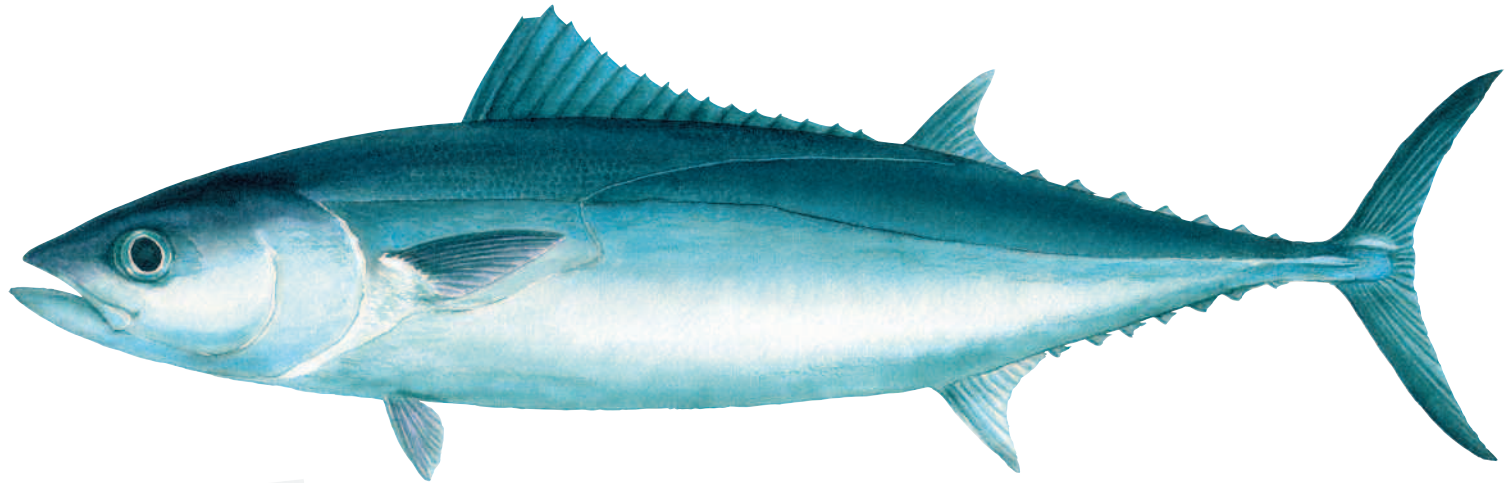

Cone-shaped (dog-like) teeth in a large mouth  
Dents coniques (dents de chien) dans une large gueule

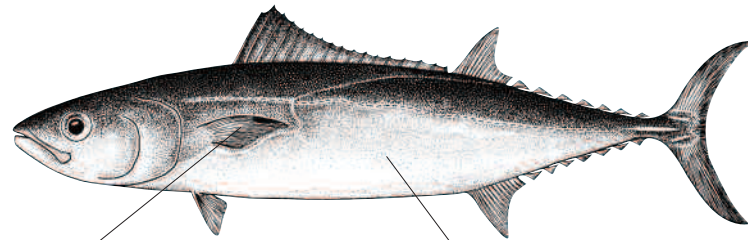

Obvious wavy lateral line  
Ligne latérale sinueuse clairement visible

# *Allothunnus fallai*

SLT

English: Slender tuna  
French: Thon élégant  
Japanese: Hosogatsuo  
Local:

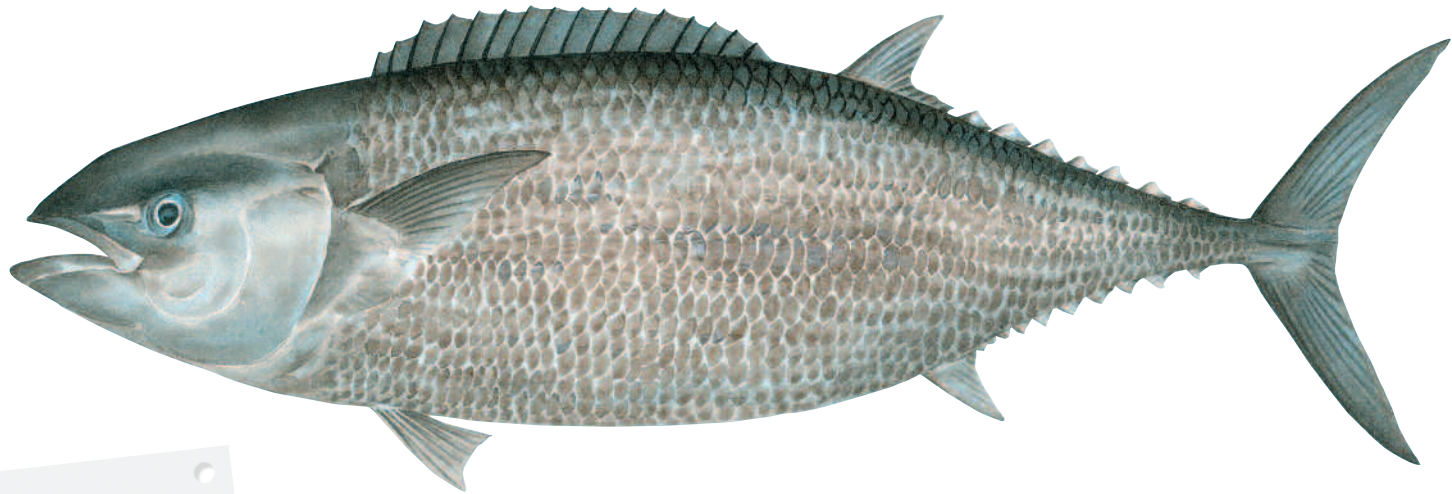

Pectoral fins very short  
Nageoires pectorales très courtes

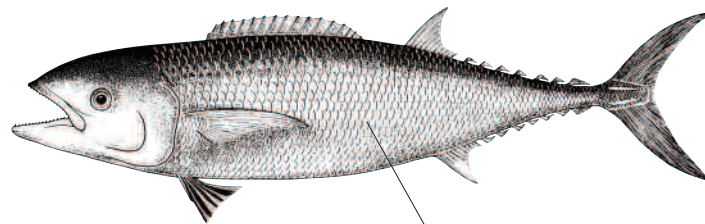

Cylindrical shaped body  
Corps cylindrique

# *Gasterochisma melampus*

BUK

English: Butterfly kingfish  
French: Thon papillon  
Japanese: Urokomaguro  
Local:

Body covered in large shiny scales  
Corps couvert de grandes écailles luisantes
