

Tuhiga Igoa o te 2006

***2006 Tokelau Census of
Population and Dwellings***

***2006 Census
Tabular Report***

Released: 20th December 2006

Produced by Statistics New Zealand and the Office of the Council for the Ongoing Government of Tokelau.

2006 Census Tabular Report – Contents

Section One – Introduction – ‘About this Report’

Section Two – Population Count Definitions

Section Three – Final Population Counts

Section Four – Tables

1 Demographic Profile

1.1 *Age-Sex Structure of the Population*

1.1.1 Age-Sex Distribution – De jure Usually Resident Population 1

1.1.2 Age-Sex Distribution – Census Night Population 2

1.1.3 Age-Sex Distribution – Census Night Absentee Population 3

1.2 *Atoll Populations by Age Groups*

1.2.1 Age – Five Year Groups by Atoll of Usual Residence – De jure Usually Resident Population 4

1.2.2 Age – Five Year Groups by Atoll of Usual Residence – Usual Residents Absent on Census Night 5

1.3 *Atoll Populations by Sex*

1.3.1 Atoll of Usual Residence by Sex – De jure Usually Resident Population . . . 6

1.3.2 Absentee Atoll of Usual Residence by Sex – Census Night Absentee Population 7

1.4 *Marital Status by Sex* 8

1.5 *Marital Status by Age – Five Year Groups* 9

2 Social Profile

2.1 *Ethnic Group by Atoll of Usual Residence* 10

2.2 *Ethnic Group by Sex* 11

2.3 *Age – Ten Year Groups by Ethnic Group* 12

2.4 *Age – Five Year Groups by Languages Spoken (Total Responses)* 13

2.5 *Religion by Atoll of Usual Residence* 14

2.6 *Smoke Cigarettes Regularly by Atoll of Usual Residence* 15

2.7	<i>Age – Five Year Groups by Smoke Cigarettes Regularly</i>	16
2.8	<i>Absentee Reason for Absence by Sex</i>	17
2.9	<i>Age –Ten Year Groups by Absentee Reason for Absence</i>	18
2.10	<i>Absentee Reason for Absence by Atoll of Usual Residence</i>	19
3	Migration	
3.1	<i>Atoll of Usual Residence by Census Night Location</i>	20
3.2	<i>Place of Birth by Atoll of Usual Residence</i>	21
3.3	<i>Age – Five Year Groups by Ever Lived Overseas for Six Months or More</i>	22
3.4	<i>Atoll of Usual Residence by Ever Lived Overseas for Six Months or More</i>	23
3.5	<i>Age –Ten Year Groups by Location Five Years Ago</i>	24
3.6	<i>Location Five Years Ago by Atoll of Usual Residence</i>	25
4	Education	
4.1	<i>Age – Five Year Groups by Last School Attended</i>	26
4.2	<i>Age – Five Year Groups by Highest Level of Education Reached</i>	27
4.3	<i>Highest School Qualification Gained by Sex</i>	28
5	Economic Activity and Employment	
5.1	<i>Activities for Household Use (Total Responses)</i>	
5.1.1	<i>Activities for Household Use by Sex</i>	29
5.1.2	<i>Activites for Household Use by Age – Five Year Groups</i>	30
5.2	<i>Activities for Use by Other Households (Total Responses)</i>	
5.2.1	<i>Activities for Other Household’s Use (Total Responses) by Sex</i>	31
5.2.2	<i>Activities for Use by Other Households (Total Responses) by Age – Five Year Groups</i>	32

6.11	<i>Main Means of Waste Disposal by Atoll</i>	50
6.12	<i>Items Owned by Household (Total Responses) by Atoll</i>	51
6.13	<i>Number of Pigs by Atoll</i>	52
6.14	<i>Number of Chickens by Atoll</i>	53
6.15	<i>Sources of Household Income (Total Responses) by Atoll</i>	54
6.16	<i>Total Household Income by Atoll</i>	55
	Appendix: 2006 Provisional Counts	56

Section One: Introduction

The following report is the second official release from the Tokelau 2006 Census of Population and Dwellings. The report contains final population counts based on information collected in the 2006 Census, as well as cross-tabulations of census data for most variables collected in the census.

The 2006 Census of Tokelau was conducted on the 19th of October 2006, by both local representatives and Statistics New Zealand staff. Significant planning went into both the collection and output phases of the 2006 Census – with consultation on various aspects of the census (for example, questionnaire content consultation) carried out in Tokelau, Samoa and New Zealand, where appropriate. The 2006 Census questionnaire was based on a standard form developed by the Secretariat of the Pacific Community (SPC), with some changes as appropriate to the Tokelau situation.

Tokelau has a unique population composition. A significant proportion of the Tokelauan population are away from the islands at any one time, for various reasons (e.g. healthcare, education). Considerable time and effort has been put into developing effective population measures for the 2006 Census of Tokelau, with a focus on ensuring all usual residents were counted – in particular those who were not present in Tokelau on census night. Core demographic information was completed by the head of the household, on behalf of people who usually live in Tokelau, but were away on census night.

Users of the Tokelau census data should be aware that comparability of data across census years may be difficult. Final population count comparisons are not recommended. Collection methodology and population count calculations have varied across censuses. Where possible, future outputs will carry out time series comparisons with 2001 and earlier. These will be comparisons of proportions only (not actual frequency counts).

A mean cell size rule was applied to all tables in this report to ensure confidentiality. In some cases, categories within variables have been aggregated to ensure tables comply with the confidentiality rule – and to prevent tables from becoming too sparse. A paper detailing the methodology used for confidentiality in the 2006 Census of Tokelau is available on request from the census manager (see back page for contact details).

Following the release of this report, further output releases will be conducted based on data from the 2006 Census of Tokelau. On the 15th February 2007 profiles of each atoll will be released. A final release – the full analytical report, will be available on the 28th February 2007. Data requests and enquiries should be directed to the Tokelau census manager.

Section Two: Population Count Definitions

De jure Usually Resident Population Counts

These population counts include the *usually resident population present in Tokelau on census night count* plus usual residents who are temporarily overseas at the time of the census: including Tokelauan TPS employees based in Apia and their families; and usual residents who are temporarily overseas. These population counts are of major interest to Tokelauan users, as they will be used for distributing funds to the three atolls.

While the *de jure usually resident population counts* will be of key interest to Tokelauan users, it is important to convey an understanding of how the other population counts are measured. This will help ensure that users will have the confidence to choose the appropriate population count depending on the situation.

The majority of detailed census data will be available for only a subset of the *de jure usually resident population counts* (see definition below). The *usually resident population present in Tokelau on Census night count* is the only population that answered the majority of census questions and will therefore be the population for which the bulk of analysis can be done.

Usually Resident Population Present in Tokelau on Census Night Count

Usually resident population present in Tokelau on Census night counts are counts of all people who usually live in Tokelau, and were present in Tokelau on census night.

These counts exclude visitors from overseas and exclude residents who are temporarily overseas on census night. Residents who are in Tokelau and were away from their usual address (i.e. on another atoll) on census night are allocated back to the atoll where they usually live and form part of the *usually resident population present in Tokelau on Census night count* of that atoll.

While the other population counts will mainly provide national and atoll population counts, it is the *usually resident population present in Tokelau on Census night count* that will be used for most of the detailed analysis. This is because we have full information for these respondents as they have been interviewed using the standard census form.

The equivalent of this count is the most commonly used population count in New Zealand.

Census Night Population Counts

Census night population counts give a snapshot of the population at a point in time. They are counts of the number of people at the place they were interviewed on census night. This count includes overseas visitors as well as visitors from elsewhere in Tokelau. It excludes Tokelau residents temporarily overseas.

Census night population counts are de facto census counts.

Section Three: Final Population Counts

1. *De jure Usually Resident Population Count*

$$\begin{aligned} &= \text{Usually Resident Population Present in Tokelau on Census Night + Usually Resident Absentee sub-population} \\ &= 1\,074 + 392^1 \\ &= 1\,466 \end{aligned}$$

2. *Usually Resident Population Count Present in Tokelau on Census Night*

$$\begin{aligned} &= \text{All people present in Tokelau on Census Night who qualify as usual residents under the specified criteria (excludes overseas visitors).} \\ &= 1\,074 \end{aligned}$$

3. *Final Census Night Population Count*

$$\begin{aligned} &= \text{All people present in Tokelau on Census Night – 19th October 2006. Includes overseas visitors and excludes people absent from Tokelau on Census Night.} \\ &= 1\,151 \end{aligned}$$

¹ People recorded as absentees from Tokelau on Census Night – who qualify as usual residents under the specified criteria – a total of 392. (33 TPS employees and their immediate families enumerated in Apia, Samoa and 359 international absentees not enumerated in Apia.)

Appendix: 2006 Provisional Counts

The provisional counts release was a good opportunity to provide some population counts very quickly after census day. This was the first information available from the 2006 Tokelau Census of Population and Dwellings.

The provisional counts are early indications of *census night population counts*. They represent good quality estimates based on an initial quality checking process, involving using the back page on the census forms (which lists people present in the household on census day).

This means that data used to produce the provisional counts has not been through processing, nor has it been validated. Therefore the 'final' *census night population counts* may differ slightly.

- = All people present in Tokelau on Census Night – 19th October 2006.
- = All names entered on back of census forms and can therefore contain duplicates. Includes overseas visitors, excludes people absent from Tokelau on Census Night.
- = 1 153
