

## APPENDIX 4-A List of projects relevant to the GCF Tuna Programme proposal

### Relevance Scale

Directly	Some overlap relating directly to tuna fisheries and climate information and use
Somewhat	Climate and ocean specific information and use – e.g. science-based advice on adaptation planning for longer term climate change impacts applied for fisheries, including coastal and other resilience work. Keywords – coastal and marine ecosystems, metrological, disaster risk, food security. Not necessarily tuna.
Less	Completed projects, projects where fisheries focus mentioned but no evidence of tuna specific activities
Marginally	OF NOTE section - Project titles listed but no summaries prepared, including contacts for multi organisation climate change financing and investment hubs
